## Memorandum

TO

C/GSD

DATE: 9 August 1965

FROM :

DD/S&D

## SUBJECT:

25X1A \_\_\_\_ people came in to demonstrate a dry film processing technique to AND which greatly relieved our problem of film processing in their PRF analysis work. understand from tand from \_\_\_\_\_ that they were told by \_\_\_\_ that a response sign of something like 2.5 nanoseconds 25X1A 25X1A was required. This kind of response time could not be achieved, of course, and I know of no circumstances under which such a 25X1A response time would be required. I have checked with 25X1A and he concurs that they were given this kind of a number. I asked 🗀 to check on the real requirement here.

25X1A
